

Slide 1 - Welcome

The slide features a dark blue header with the text "Using PDF/A Format" and a small red exclamation mark icon. A white information box is positioned in the upper right, containing the following text: "Using PDF/A Format in CMECF", "Production Information:", "Produced by AO-OIT-SDSD-TB", "Contact Information: AOTXml\_ELM@aotx.uscourts.gov", "Date: December, 2010", and "Electronic Learning Module 1.0". The left side of the slide has a dark blue background with the "AO Office of Information Technology" logo. The main content area is light beige with the title "Using PDF/A Format" in a large, bold, italicized font, centered above a thick dark grey horizontal bar.

Slide 2 - Navigation

← Table of Contents

### Navigation Instructions

Press **F11** to view this lesson in full screen.

You can **Fast Forward** or **Rewind** the lesson by using the Navigation bar at the bottom of the screen.

You may turn **Closed Captioning** on and off by clicking the **CC** button at the lower right of the screen in the Navigation bar.

This module also has a **Table of Contents**, or **TOC**, to jump to different sections of the lesson. You can open and close it with either:

- the arrows in the top left corner of the screen,
- or the **TOC** button in the Navigation bar.

Click **START** when you are ready to begin.

**START**

Slide notes

Here are the instructions for navigating through this lesson. Click the START button when you are ready to begin.

Slide 3 - Objectives

## ***Objectives***

When you complete this lesson, you should be able to:

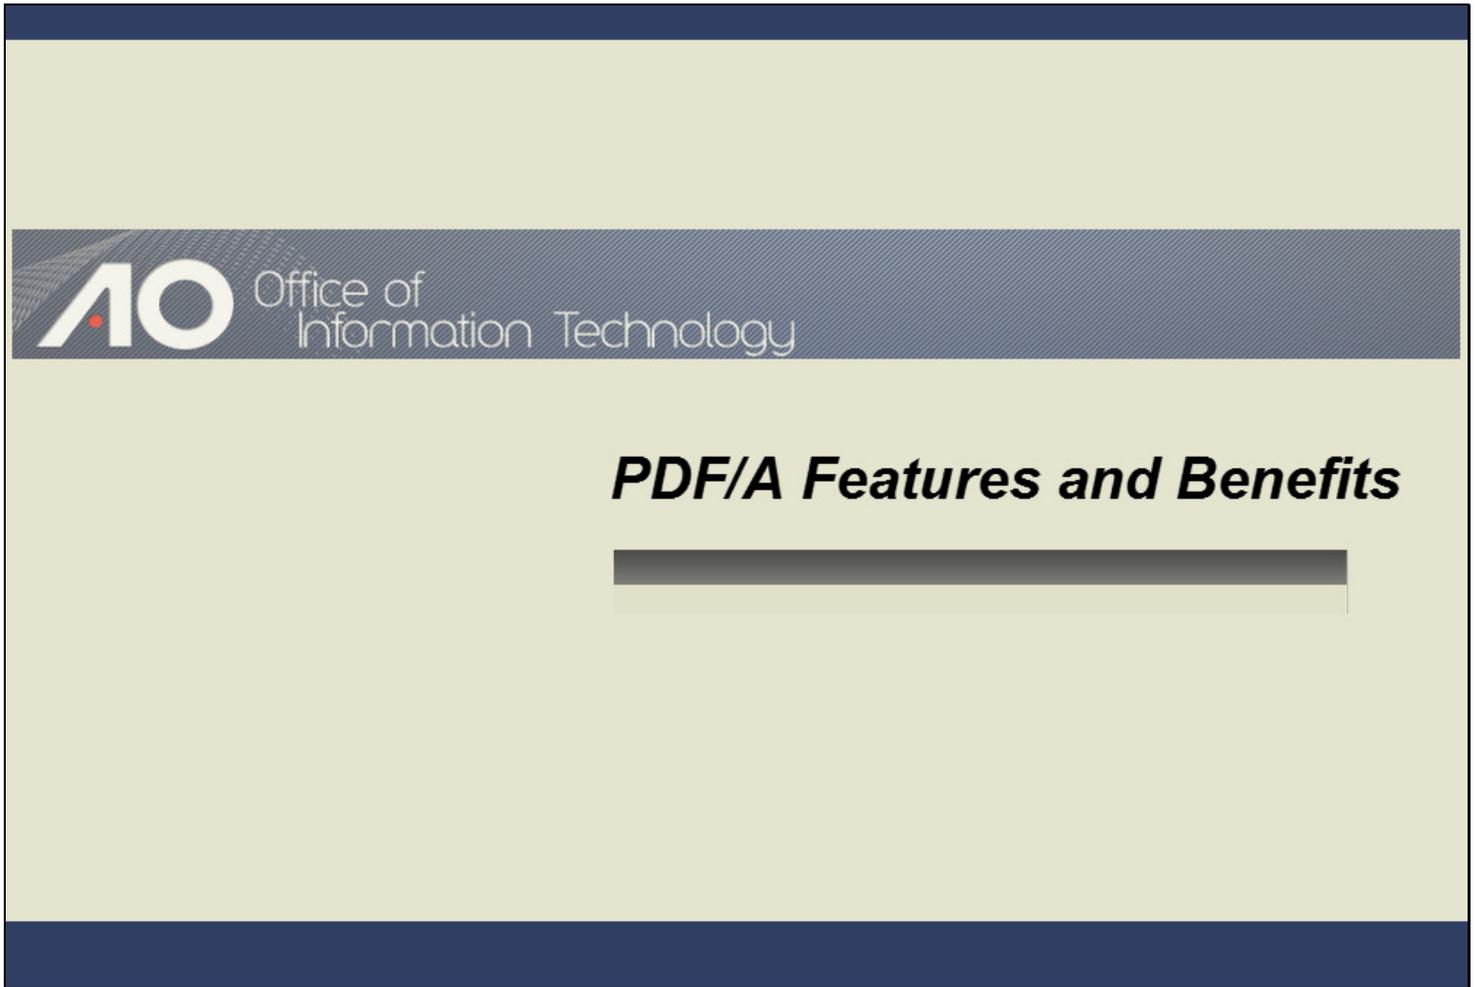

- Explain the purpose of PDF/A document formatting.
- Set the correct preferences in and create PDF/A documents with both Microsoft Word and WordPerfect X4.

CONTINUE

**Slide notes**

When you complete this lesson, you should be able to explain the purpose of PDF/A document formatting and set the correct preferences in and create PDF/A documents with both Microsoft Word and WordPerfect X4. Click CONTINUE.

Slide 4 - PDF/A Features and Benefits

The slide content area features a dark blue header bar at the top. Below it is a light beige background. A dark blue horizontal band with a fine grid pattern contains the logo for the Office of Information Technology (AO) on the left, consisting of the letters 'AO' in white with a red dot on the 'O', followed by the text 'Office of Information Technology' in white. The main title of the slide, ***PDF/A Features and Benefits***, is centered in a large, bold, black serif font. Below the title is a thick, dark grey horizontal bar. The slide concludes with a dark blue footer bar.

Slide 5 - What is PDF/A?

## *What is PDF/A?*

- PDF/A is Adobe's Portable Document Format for long-term Archiving.
- It is an ISO standard adopted at the end of 2005.
- PDF/A was developed to ensure that documents viewed today will be able to be opened and seen exactly the same way in the future regardless of the technology used to view them.

### **Slide notes**

PDF/A is Adobe Corporation's Portable Document Format for long-term archiving. It is an International Standards Organization (or ISO) standard adopted at the end of 2005.

PDF/A was developed to ensure that documents viewed today will be able to be opened and seen exactly the same way in the future regardless of the technology used to view them.

Slide 6 - Why Use PDF/A?

## Why Use PDF/A?

- PDF/A format is better suited to long-term storage of documents.
- Everything that is required to present the document the same way every time it is viewed - such as fonts, color profiles and images - is all contained in the PDF/A file.
- The PDF/A format eliminates the risks inherent to the use of some content in classic PDF format. The use of dynamic content (content that changes based on software), as well as video, audio and Java scripting is prohibited in PDF/A formatting.
- Hyperlinks contained within PDF/A documents will not be active. To access the referenced hyperlink, users must copy and paste the URL into a browser window.

### Slide notes

PDF/A formatting is better suited to long-term storage of documents, as everything that is required to present the document the same way every time it is viewed -- such as fonts, color profiles, and images -- is all contained in the PDF/A file.

The format eliminates the risks inherent to the use of some content in classic PDF format. The use of dynamic content (that is, content that changes based on software), as well as video, audio and Java scripting is prohibited in PDF/A formatting.

With very few exceptions, hyperlinks contained within PDF/A documents will generally not be active. To access a referenced hyperlink, users must copy and paste the URL into a browser window.

Slide 7 - Keep in Mind...

*Keep in Mind...*

- Since PDF/A documents store font, color profile and image information, they have a larger file size than classic PDF documents.
- Older versions of Adobe Reader are capable of viewing PDF/A documents.
- PDF/A documents scanned using Optical Character Recognition (OCR) are included in the CM/ECF Full Text Search function.

**Slide notes**

There are some things to keep in mind when dealing with PDF/A documents. Since PDF/A documents store font, color profile and image information, they have a larger file size than classic PDF documents.

In addition, older versions of Adobe Reader are capable of viewing PDF/A documents. Finally, PDF/A documents scanned using Optical Character Recognition (or OCR) are included in the CM/ECF Full Text Search function.

Slide 8 - PDF/A and CM/ECF

## PDF/A, CM/ECF and You

- CM/ECF has been modified to accept PDF/A documents.
- Eventually, PDF/A format will be the standard for all courts.
- Most existing word processing software is capable of generating documents in PDF/A format.
- Your court will ensure that you are informed about PDF/A document formatting requirements and deadlines.

### Slide notes

As an electronic filer, it's important for you to know that while PDF/A format is not strictly required by CM/ECF, the system has been already been modified to accept PDF/A documents. This allowed courts to begin to voluntarily move to accepting only PDF/A documents.

Your court has chosen to begin this requirement. Eventually, all courts will require PDF/A document formatting. Most existing word processing software is capable of generating documents in PDF/A format. This module details procedures for doing so using Microsoft Word and

WordPerfect X4. Stay in touch with your court and visit its website regularly to stay informed about additional PDF/A document formatting requirements and any deadlines or start dates for their inclusion in your filings.

Slide 9 - Creating a PDF/A with Microsoft Word

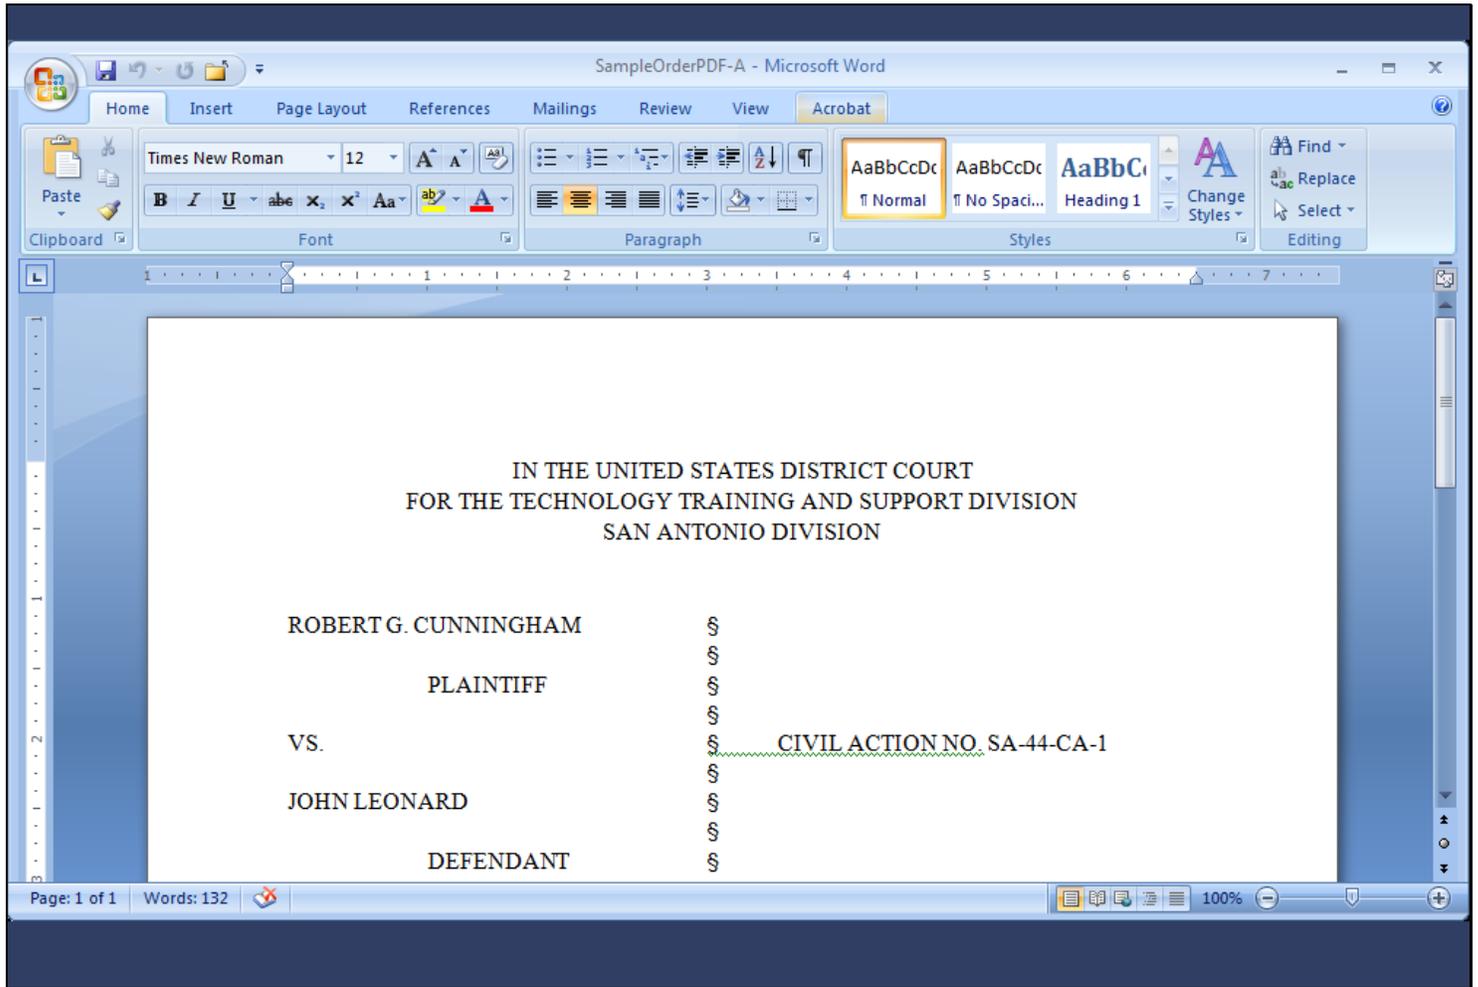

The slide features a light beige background with a dark blue header and footer. A dark blue horizontal band across the middle contains the AO logo (a stylized 'A' and 'O' with a red dot) and the text 'Office of Information Technology'. The main title, 'Creating a PDF/A Document with Microsoft Word', is centered in a bold, italicized black font. Below the title is a thick, dark grey horizontal bar.
